Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

3. Claims 1-3 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Inoue (U.S. 2005/0242560).

Inoue steering column positioning device, comprising: a vehicle body mounting bracket (3) comprising a pair of vertical plate portions (3c; 3d); a cylindrical steering column (21) comprising a bulge portion (the expanding portion of the steering column in figure 3) gripped by the pair of vertical plate portions (3c; 3d) of the bracket; a rotatable steering shaft (13) inside the steering column (21); a shaft rod member (31) passing through the bulge portion of the steering column (21) and the pair of vertical plate portions of the bracket (3); and a fastening mechanism (31a, 33), on the shaft rod member (31) and which secures the steering column (21) by adjusting a distance between the opposing pair of vertical plate portions (3c, 3d); wherein the bulge portion

comprises a pair of flat surface portions (flat surface portion of the steering column as shown in figure 3) formed in opposition to the pair of vertical plate portions of the bracket (3), projection portions (25, 27) protruding from the pair of flat surface portions toward the opposing vertical plate portions, and elongated holes (37) perforated into the projection portions (25, 27) for allowing telescopic adjustment; wherein the projection portions (25, 27) protrude outwardly from the flat surface portions (), wherein a span of the flat surface portions of the bulge portion is equal to or larger than an outer diameter of the steering column (21).
